Immediate Release Wednesday 9 March 2016

Reasonable start to the year for UK mechanical engineering business

Confidence remains constrained

UK mechanical engineering got off to a reasonable start in 2016, with enquiry levels up substantially for UK and for export business and the trend on UK order levels stronger than for some while according to the Engineering and Machinery Alliance's (EAMA) Business Monitor.

Martin Walder, EAMA chairman: "This month the lead indicators are very encouraging with marked increases in the number of firms reporting gains in enquiries from UK and overseas prospects.

"With more than half the companies also reporting increases in UK orders, this January was a particularly strong month. In fact that's the best since January 2014, which was a time when we thought we might be on the verge of a stronger recovery. Our three-month running averages for UK orders is now considerably ahead of where it was this time last year. Export order trends remain subdued however, pretty much where they were in 2015.

"The jobs trend is stable, with a quarter of firms reporting plans to take on people so that the multiple monthly average on that score is in the same territory as 12 months ago.

"Investment activity has fallen back since the end of Q3 last year with around three in ten firms reporting heavy investment activity compared with four or even five in ten in the first half of 2015.

"Access to finance tightened somewhat in a scene showing only modest changes month on month for the last year or so. The changes the Monitor is recording may well relate to banks' decisions to reduce certain facilities because they see companies, particularly SMEs, not using the lines of credit etc that have been set aside for the purpose.

"The muted improvements in confidence levels are disappointing given January's strong enquiry and order levels, as the Monitor's balance only nudged up to zero from a minus four the previous month. This probably reflects the very large number of economic uncertainties that surround companies today from macro trends in the global economy like China's slow-down and the substantially lower oil and gas prices on the one hand and UK specific changes and challenges possible changes in the upcoming Budget, automatic pension enrolment, the increases in the living wage, the EU Referendum and its implications for trade and for the strength of Sterling."

(ends - data attached)

Notes to editors:

1. EAMA's 13 trade associations represent 1,900+ firms: Agricultural Engineers Association, -- British Automation and Robot Association -- British Compressed Air Society -- British Fluid Power Association -- British Paper Machinery Suppliers Association -- British Plastics Federation -- British Turned Part Manufacturers Association -- Gambica -- Gauge and Toolmakers Association -- Manufacturing Technologies Association -- Printing Industry Confederation -- Processing and Packaging Machinery Association -- UK Industrial Vision Association
2. There's no December Monitor as the business period for many firms is only a three-week span.
3. The Monitor records the proportion of firms in each category, not the number of enquiries, orders etc
4. The Monitor averages between 80-110 returns each month
5. Monitor reports for 2010-2011 are available on the EAMA website: www.eama.info
