**Rupert Hodges, Alliance Secretary, Office: 020 7298 6450; Mobile: 07939 722 447**

**Draft Immediate Release Monday 27 August 2012**

## **Mechanical engineering orders begin to stabilise in July** Investment and employment expectation pick up

In July, companies in the mechanical engineering sector began to see some improvements in their order books according to the Engineering and Machinery Alliance's (EAMA) Monthly Business Monitor. Investment and employment trends also improved this month compared to June.

The gains came after a particularly bad set of figures in June.

Martin Walder, EAMA chairman: "There was a healthy increase in the number of firms reporting order gains both for the UK and for overseas business. And this despite some continuing poor enquiry levels, particularly on exports.

"While companies may have done better than expected in closing orders, it's important that we and the government look at the resources needed to help companies find new customers at home and overseas.

"One of the features that's characterised the mechanical engineering sector over the last two years has been employers' desire to recruit more people. And it seems just as strong this month as it was a year or more ago.

"We also enjoyed a similar and positive commitment to company investment from around autumn 2010 to early spring this year when companies became more cautious again and investing businesses have been outnumbered in the Monitor by non-investors. After four months of such tightening we may have begun to see some modest improvements with plans turning into real investment in plant and upgraded skills.

"This is an unexpectedly big improvement. Firms said they were investing to reduce operational costs, improve productivity, upgrade machines for new products and limiting investment to projects that will give a return within a year or less.

"It's also good to see access to investment finance easing a tad. I know it's not much but anything in that regard is welcome as long as it is then maintained. Over the last year, such gains have been short-lived.

"Confidence will have to strengthen here and abroad before we see these sort of gains consolidated widely, but sector companies are making their judgements about what needs to be done. The government's mooted industrial policy will be timely if it gives companies a sounder base on which to plan, invest and search for new business."

## Notes to editors:

1. EAMA's 12 trade associations represent 1,700 firms: Agricultural Engineers Association, -- British Automation and Robot Association -- British Paper Machinery Suppliers Association -- British Plastics Federation -- British Turned Part Manufacturers Association -- Confederation of British Metalforming -- Gauge and Toolmakers Association -- Manufacturing Technologies Association -- Polymer Machinery Manufacturers and Distributors Association -- Printing Industry Confederation -- Processing and Packaging Machinery Association -- UK Industrial Vision Association
2. There's no December Monitor as the business period for many firms is only a three-week span.

## The Monitor
