

PRESS RELEASE

Rupert Hodges, Alliance Secretary, Office: 020 7298 6450; Mobile: 07939 722 447

Immediate Release Thursday 18 July 2013

UK mechanical engineering firms complete improving second quarter

Second quarter data show UK mechanical engineering companies are on an improving trend, but firms are right to remain cautious according to EAMA's chairman Martin Walder. "The Engineering and Machinery Alliance's June Business Monitor shows businesses have been successfully scouting their prospects and generating an increased number of enquiries and orders.

"Since the start of the year, a third or more of companies have reported increases in their enquiries from British companies. The ratio from overseas may be a little lower but the overall balances are very promising with the monthly averages across the second quarter stronger for export business than in the first despite the fact that in Q1 many companies were building up from a low 2012 base."

The picture round orders is more complicated. Consistently around two in five firms reported improved UK order intakes, averaging 42% of all respondents in Q1 and 40% in Q2. The monthly returns from exporters reporting order gains haven't been as steady, with monthly returns more erratic than Q1 – for example May's negative export balance of -4 has become a positive balance of +13 in June.

Martin Walder again: "Q2 average monthly order balances are a little down on Q1 this year but are streets ahead of Q2 2012. And despite the volatility in the export numbers, it's striking that on average better than two in five exporters report business remaining unchanged from month to month. Given their experience and the sales they have gained from the activity, it's important that we help these companies to build on their success in other foreign markets."

June's Monitor continues to show modest increases in the number of firms taking on new recruits with fewer than one in 12 companies expecting to cut jobs and more than one in six expecting to take on employees. The Q1 average monthly positive balance on jobs stood at +6, in Q2 it rose to +10. For the third month in a row, three-quarters of all respondents plan no job changes.

Martin Walder again: "The June Monitor remains inconclusive on investment. A majority of firms (54%) are investing if all forms of investment including training are included. Exactly the same number of companies (37%) say they are investing in all areas as say they are developing projects but not committing to them. Perhaps this reflects the continuing mood of cautious investment. On the more positive side, June is the fourth month in a row when over a third of respondents have said they are "investing in all areas". And the Q2 monthly average is 35% which is a significant 12 points higher than the average in Q1 (23%).

"Also there's a hint of more positive potential on finance. I know we've said this before only to find our hopes come to nought. First one should note more than four in five companies say little has changed, but round the fringes there are changes to note. For example, the monthly ratio of firms saying things have got more difficult fell by a third between Qs 1 and 2 (from 14/15% to 10%) for working and investment finance. If there's more good news over the next months on these measures, then we may well begin to see the green shoots of an investment-led recovery."

(ends)

(data attached)

Notes to editors:

1. EAMA's 11 trade associations represent 1,400 firms: Agricultural Engineers Association, -- British Automation and Robot Association -- British Paper Machinery Suppliers Association -- British Plastics Federation -- British Turned Part Manufacturers Association -- Gauge and Toolmakers Association -- Manufacturing Technologies Association -- Polymer Machinery Manufacturers and Distributors Association -- Printing Industry Confederation -- Processing and Packaging Machinery Association -- UK Industrial Vision Association
2. There's no December Monitor as the business period for many firms is only a three-week span.
3. The Monitor records the proportion of firms in each category, not the number of enquiries, orders etc

The Monitor
