

PRESS RELEASE

Rupert Hodges, Alliance Secretary, Office: 020 7298 6450; Mobile: 07939 722 447

Immediate Release Thursday 30 April 2015

Mechanical engineering: Q1 business down on 2014

While companies generally cautious, jobs and investment still strong

Although jobs and investment numbers remained strong in the first quarter compared with a year ago, average monthly enquiry and order numbers are some way behind last year according to the Engineering and Machinery Alliance's March Business Monitor.

Martin Walder, EAMA chairman: "Q1 results are mixed. On the one hand they seem to show firms taking a cautious approach reflected in fewer firms reporting gains in UK derived enquiries and orders than a year ago with the same signals coming through when it comes to exporters.

"Sterling strength may have something to do with this as Q1 export enquiry balances are far weaker than a year ago (-1 compared with +23 in 2014), whereas export orders placed compare much more favourably (+10 now +15 in 2014).

"The jobs balance shows that firms are still recruiting and on investment the trend over the last three years is quite compelling. When all types of investment are included (training as well as capital) we see that the proportion of firms investing has risen from 45% in Q1 2013 to 55% last year and 65% this.

"UK firms seem to be investing in skills, R&D and other intangibles as well as plant to help unlock important opportunities to improve competitiveness.

"However, confidence levels aren't high and access to finance may be slipping back again after noticeable improvements in both these areas in 2014.

"By the second half of 2014, finance no longer seemed to be a constraint for most businesses. Now we have a small number of firms saying things are becoming more difficult while there's a vanishingly small number of firms saying access is easier.

"We remain guardedly optimistic that whoever forms the government after May 7th they will get on with the job along the broad policy lines of the last two administrations. UK productivity will still need improving. Manufacturing will still offer huge potential of excellent jobs for people with a wide range of aptitudes. Investment in skills, R&D and capital plant will be as vital as ever and all of that can be achieved with the right long term policy commitments and complementary industrial strategies and business plans. And EAMA aims to play its part."

(ends - data attached)

Notes to editors:

1. EAMA's 12 trade associations represent 1,800 firms: Agricultural Engineers Association, -- British Automation and Robot Association -- British Fluid Power Association -- British Paper Machinery Suppliers Association -- British Plastics Federation -- British Turned Part Manufacturers Association -- Gambica --Gauge and Toolmakers Association -- Manufacturing Technologies Association -- Printing Industry Confederation -- Processing and Packaging Machinery Association -- UK Industrial Vision Association
2. There's no December Monitor as the business period for many firms is only a three-week span.
3. The Monitor records the proportion of firms in each category, not the number of enquiries, orders etc

The Monitor
