

PRESS RELEASE

Rupert Hodges, Alliance Secretary, Office: 020 7298 6450; Mobile: 07939 722 447

Immediate Release Thursday 23 June 2011

Order and inquiry levels still positive, but access to finance falls back down again Mechanical Engineering Business Monitor for May 2011

In May, mechanical engineering firms' prospecting rates returned to normal rather than exciting levels, while UK order intake improved significantly on last month and exports remained at the softer levels seen over the last three months, according to the Engineering and Machinery Alliance's Monthly Business Monitor.

Martin Walder, EAMA chairman: "Although returns on inquiries and orders have stepped down in intensity now compared to the first quarter, the Monitor seems to be indicating that underlying business is good in that the majority of firms are still bullish on jobs, with over a quarter (28%) signalling increased numbers compared to last month, when the balance was particularly high.

"This positive trend on jobs has been with us since February. But the positive developments we had also been seeing since then with regard to access to finance have melted away this month. It is worrying to see what looked like a positive trend emerging disappear as this move back into negative territory coincides with anecdotal reports of banks renegotiating stiffer overdraft terms.

"Hopefully next month we will have more positive figures to report, so that firms with investment plans and expansion projects can take advantage of them and build up their export sales. Two-thirds (63%) of companies say they are investing in one way or another this month, with a third (36%) saying they are investing in all areas. But that's down on last month's 46%.

"Our sense is that companies are still trying to limit their exposure to banks, preferring to use their own resources for investment because confidence remains fragile. Not only is the memory of the banks' ability to change terms at extremely short notice raw, there are also many other factors affecting business prospects, from the reduction in public expenditure to the impact of the Japanese tsunami on supply chains, the speed of recovery in Europe and when manufacturers are going to start producing for the UK's nuclear power programme."

(Monitor data attached)

Notes to editors:

EAMA's 12 trade associations represent 1,700 firms: Agricultural Engineers Association, -- British Automation and Robot Association -- British Paper Machinery Suppliers Association -- British Plastics Federation -- British Turned Part Manufacturers Association -- Confederation of British Metalforming -- Gauge and Toolmakers Association -- Manufacturing Technologies Association -- Polymer Machinery Manufacturers and Distributors Association -- Printing Industry Confederation -- Processing and Packaging Machinery Association -- UK Industrial Vision Association
